

Recombinant LXR β -LBD Protein

Catalog Number	Size
AG1066-10	10ug
AG1066-25	25ug
AG1066-B	Bulk

Description

The ligand-binding domain of the human liver X receptor beta (LXR β -LBD) was expressed in the E coli system and purified by the combination of Ni-affinity column and other conventional chromatographic methods. The resulted protein contains 272 amino acids with a 6His tag at the N-terminus. It migrates in SDS-PAGE with an apparent molecular mass of 28kDa.

Accession Number

NM_007121

Molecular Mass

Approximately 28kDa.

Purity

≥90%, as determined by SDS-PAGE.

Biological Activity

LXR β is a ubiquitously expressed transcription factor regulating expression of target genes containing LXR response elements. The recombinant LXR β -LBD protein can be used for the studies of transcription assays, protein-protein or protein-ligand interactions and other related function assays.

Formulation

20mM Tris-Cl (pH7.9), 20% glycerol 100mM NaCl, 1mM DTT and 1mM EDTA.

Storage

The protein sample can be stored under sterile conditions at 2-8°C for one month or at -20°C to -70°C for three months without detectable loss of activity. (**Avoid repeated freeze-thaw cycle**)
